

A Free, Internet-Based Activity

Addressing the Immunological Imbalance in Sepsis

COURSE DIRECTOR

Stefano Busani, MD

Associate Professor of Anesthesia and Intensive Care
University of Modena and Reggio Emilia
Modena, Italy

FACULTY

Dr Tim Rahmel

Senior Consultant
Department of Anesthesiology, Intensive Care
Medicine, and Pain Management
University Hospital Knappschafts Krankenhaus
Bochum, Germany

Ener Cagri Dinleyici, MD

Professor of Pediatrics
Department of Pediatrics
Eskisehir Osmangazi University
Eskisehir, Turkey

Massimo Girardis, MD

Full Professor and Head of Anesthesia and Intensive
Care Unit
University Hospital of Modena
Modena, Italy

Supported by an independent
educational grant from **Biotest**

Addressing the Immunological Imbalance in Sepsis

TARGET AUDIENCE

This activity is intended for an audience of physicians, specifically critical care specialists, pediatricians, infectious disease specialists, and pulmonologists in Europe, Latin America, the Middle East, and North Africa.

GOAL STATEMENT

The goal of this activity is for learners to better understand the rationale for the use of IgM-enriched immunoglobulins in sepsis, their mechanism of action (MoA), key clinical evidence, and practical considerations for use.

ACCREDITATION STATEMENT

WebMD Global LLC is an EBAC® accredited provider since 2024

Total effective education time: 30 minutes. EBAC Activity ID # 2025-EPN-8832000-000.

LEARNING OBJECTIVES

Upon completion of this activity, participants will:

Have increased knowledge regarding the

- Rationale for the use of IgM-enriched immunoglobulins in sepsis
- Clinical evidence for the use of IgM-enriched immunoglobulins in sepsis
- Practical considerations for the use of IgM-enriched immunoglobulins in sepsis
